

WASHINGTON, DC CIVIC JOURNEY · 8TH GRADE · APRIL 14 TO 18, 2027

Trip Risk Working File

The trip's hazards, controls and emergency information, organized one section per activity group, for the school to review, complete and approve.

One section per activity group: what students do and where, the hazards of each activity and place, the controls already set out in the Trip Leader Card, and the emergency information for each place, including the designated emergency department. It supports whichever forms of risk documentation the school uses: its field trip risk assessment, its emergency action procedures and the live assessment the trip leader makes during the trip.

Trip summary

From the School Trip Record

Trip	Washington, DC Civic Journey · 8th grade · Wednesday, April 14 through Sunday, April 18, 2027. Three hotel nights in College Park, Maryland, and an overnight bus ride home Saturday night.
Group	30 eighth-grade students and 6 staff chaperones, one adult for every five students; each group of five stays with the same chaperone all week. Trip leader Emily Carter; co-leader Marcus Lee; school nurse Rachel Morgan, RN; school contact Jordan Patel, Head of Middle School.
Program	National Archives educator-led program; U.S. Capitol tour; Library of Congress; National Museum of African American History and Culture; National Museum of American History; the World War II, Vietnam Veterans, Lincoln and Korean War Veterans memorials at dusk; Arlington National Cemetery; National Portrait Gallery; Lafayette Square and the White House from outside.
Transportation	One Lakefront Student Transportation motorcoach with seat belts. Thomas Reed drives Wednesday through Saturday; Angela Ruiz and Kevin Walsh drive the overnight return. 372 miles each way.
Lodging	Holiday Inn Washington–College Park (I-95), 10000 Baltimore Avenue, College Park, MD 20740 · 301-345-6700. Students in triple rooms on two corridors, a chaperone room on each.
Emergency care	Call 911 first. In Washington: George Washington University Hospital, 900 23rd Street NW · 202-715-4000. Near the hotel: Adventist HealthCare White Oak Medical Center, 11890 Healing Way, Silver Spring, MD · 240-637-4000. On the highway, responders choose the hospital.

Activity groups in this file

Each group has its own section, emergency care and live-assessment record

G01	Charter Bus Travel · 5 risks · Wednesday, April 14, 5:00 a.m. to about 1:35 p.m.	3–5
G02	Hotel Overnight Stays · 4 risks · Wednesday, April 14 to Saturday, April 17: three nights, with rooms from 3:00 p.m. Wednesday and checkout by 7:30 a.m. Saturday	6–8
G03	Museums and Public Buildings · 4 risks · Thursday: National Archives 8:45 a.m., U.S. Capitol 12:30 p.m., Library of Congress 2:30 p.m.	9–11
G04	On Foot in Washington · 5 risks · Thursday lunch on the Capitol grounds and the walk to the Library of Congress and Supreme Court	12–14
G05	Arlington National Cemetery · 3 risks · Saturday, April 17, 8:30 to 11:15 a.m.	15–16

Review The trip leader and the Head of Middle School read each section against the Trip Leader Card and the school's own field trip procedures.	Complete The school adds or amends controls in each group's review record, confirms the items marked for confirmation and sets its own ratings where they differ.	Approve The sign-off on the next page records the school's review and approval. The decision to proceed and the duty of care stay with the school.	Carry The Trip Leader Card carries the emergency plan on the trip. This file stays with the School Trip Record; the record lines are completed on the day.
---	---	--	--

Washington, DC
April 14 to 18, 2027

Rating Scales and Sign-off

Each risk is rated before its controls (inherent) and with them in place (residual) as likelihood × severity. The school may substitute its own scales.

Likelihood

1 • Rare	Has not occurred on comparable trips; highly exceptional
2 • Unlikely	Possible but not expected under typical conditions
3 • Possible	Has occurred before in similar settings
4 • Likely	Occurs regularly in comparable settings
5 • Almost certain	Expected to occur without controls

Severity

1 • Insignificant	No injury, or first aid only
2 • Minor	Minor injury or illness; no lasting effect
3 • Moderate	Medical treatment needed; temporary limitation
4 • Major	Serious injury; significant or lasting impairment
5 • Catastrophic	Death or permanent life-altering injury

Risk bands

Likelihood × severity

SCORE	BAND	WHAT THE BAND USUALLY MEANS
1 – 4	Low	Routine controls are usually sufficient; the standard procedures in the Trip Leader Card apply.
5 – 9	Moderate	A control review is usual at this band; closer supervision or a procedural change may follow.
10 – 16	High	Senior review is usual before the activity proceeds, with additional controls considered.
17 – 25	Extreme	The highest level of review, including the decision on whether to proceed.

Scales follow the ETI360 Operational Capability Framework. Ratings in this file are ETI360's starting point from the trip pack and the venues' published rules; the school's own ratings, where they differ, are recorded in each group's review record.

Review and sign-off

ETI360 prepared and organized the supporting information in this file from the trip's itinerary, the bus company's and hotel's arrangements, the venues' published rules, the school's procedures, maps and other supporting material. The school reviews the information, determines the appropriate controls and level of risk, and completes and approves its chosen documents. ETI360 does not approve or certify them. Sign-off records that review; the decision to proceed, any live assessment made during the trip, and the duty of care remain with the school.

Charter Bus Travel

5 risks set out · Wednesday, April 14, 5:00 a.m. to about 1:35 p.m. · Washington transfers Thursday to Saturday · Saturday 9:00 p.m. to about 6:00 a.m. Sunday

Washington, DC
April 14 to 18, 2027

Where. I-480, the Ohio and Pennsylvania Turnpikes, I-70, I-270, the Capital Beltway and US-1; Washington streets between the hotel, the sites and the pickup points **Supervision.** Six chaperones seated front, middle and rear; one adult for every five students. Thomas Reed drives Wednesday through Saturday; Angela Ruiz and Kevin Walsh drive the overnight return.

One Lakefront Student Transportation motorcoach with seat belts, restroom and underfloor luggage carries the group 372 miles each way with three rest stops out and four home, and makes every transfer in Washington. The overnight return leaves the hotel at 9:00 p.m. Saturday with a second driver team that has been off duty all day.

Road traffic collision on the highway

RISK G01-R01 · TRANSPORTATION

Overview	Seven hours of interstate and turnpike driving each way, part of it overnight, in a 56-passenger motorcoach. A collision at highway speed is the most serious risk on the trip, and the one the group can do least about once it is under way.
Consequence	Serious injury or death to students, chaperones or drivers; multiple casualties in one event.
Rating	Inherent High · 10 (likelihood 2, unlikely; severity 5, catastrophic) · Residual with the controls in place Moderate · 5 (likelihood 1, rare; severity 5, catastrophic)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
• Seat belts fastened whenever seated, checked by the chaperone in each section before every departure; assigned seats; aisle kept clear. • Named, licensed drivers working within the federal hours-of-service rules for passenger carriers; the overnight team reports at 8:15 p.m. Saturday after a full day off duty. • Rest stop about every two hours; drivers stop earlier at any concern. The schedule never comes first. • Weather and road check with Jordan Patel on Tuesday, April 13, and again before each long leg; departure delayed or the bus held at a plaza in severe weather. • The school holds Lakefront's contract, insurance certificate and driver schedule in the trip file and confirms them before the trip.	1. The driver secures the bus and calls Lakefront dispatch; Emily Carter calls 911 with the highway, direction and nearest milepost or plaza. 2. Students stay seated and belted unless the bus must be evacuated; if it must, chaperones lead groups off the traffic side to a point behind a barrier and count. 3. Rachel Morgan, RN, triages and treats within her training; chaperones give first aid within theirs. 4. Emily calls Jordan Patel; the school calls families. A chaperone travels with any student taken to hospital, with the health record. 5. Emily keeps the group together and follows the direction of emergency responders for onward travel.

Driver fatigue on the overnight return

RISK G01-R02 · TRANSPORTATION

Overview	The return leaves at 9:00 p.m. and runs through the night. Fatigue, not mechanical failure, is the usual cause of overnight motorcoach crashes, so the control is a rested second driver team and the freedom to stop.
Consequence	Loss of control or a drift off the road at night; serious injury or death.
Rating	Inherent High · 15 (likelihood 3, possible; severity 5, catastrophic) · Residual with the controls in place Moderate · 5 (likelihood 1, rare; severity 5, catastrophic)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
• A second driver team, Angela Ruiz and Kevin Walsh, drives the overnight leg after a full day off duty; Thomas Reed's duty ends at the 8:15 p.m. handover. • Daniel Kim checks the drivers' names against the Lakefront schedule at the handover; Emily briefs the stops and the arrival plan. • Four rest stops at roughly two-hour intervals; the drivers may stop at any time and are told so before departure. • Two chaperones awake at all times on a fixed watch rota; the bus is quiet from 10:00 p.m. • No pressure on the arrival time: Jordan Patel updates families from the last plaza, whatever the estimate.	1. A driver who reports fatigue or any chaperone who notices it tells Emily; the bus stops at the next safe place. 2. The drivers swap or rest; Emily calls Lakefront dispatch if the schedule cannot continue safely. 3. Emily calls Jordan with the new arrival estimate; Jordan messages families. 4. The chaperone watch stays awake and counts at every stop; nobody leaves the bus without a chaperone.

Charter Bus Travel

Washington, DC
April 14 to 18, 2027

Student separated or left behind at a rest stop

RISK G01-R03 · SUPERVISION

Overview	Seven plaza stops, four of them in the dark, with 30 students using restrooms and food counters shared with the public. A student left behind at a turnpike plaza is stranded far from the group.
Consequence	A student alone at a plaza or in a parking lot; risk of injury, distress or contact with strangers.
Rating	Inherent High · 12 (likelihood 3, possible; severity 4, major) · Residual with the controls in place Low · 4 (likelihood 1, rare; severity 4, major)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
- Students leave and return by group with their chaperone; buddy pairs inside each group; nobody is alone anywhere in a plaza. - Head count before students get off and again once everyone is back on; the bus does not move until Emily closes the count. - Students who stay on the bus at a stop remain with one chaperone. - Each student carries the school trip card with Emily's number and the hotel address. - Stop times are fixed and announced; groups return five minutes before departure.	- Stop the group. The chaperone confirms where and when the student was last seen and calls Emily. - Emily alerts plaza staff; Marcus Lee holds the other groups on the bus and counts. Students do not search. - If the student is not found within ten minutes, Emily calls 911 and Jordan Patel; Jordan handles the family. - If the bus has left, it stops at the next safe place; Lakefront dispatch and the plaza are called; a chaperone returns for the student.

Medical event on the road

RISK G01-R04 · HEALTH

Overview	Illness, an allergic reaction, motion sickness or an injury while the bus is between stops, where the nearest emergency department is unknown until responders are called.
Consequence	A student needing urgent care far from a hospital; delay in treatment.
Rating	Inherent Moderate · 9 (likelihood 3, possible; severity 3, moderate) · Residual with the controls in place Moderate · 6 (likelihood 2, unlikely; severity 3, moderate)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
- Rachel Morgan, RN, travels with the group carrying every health form, the medication case and the family authorizations. - Students with auto-injectors or inhalers carry them; Rachel carries spares where the family has authorized them. - Water and dietary-checked snacks aboard; motion-sick students seated forward; restroom on the bus. - Medication rounds on schedule (7:00 a.m. and 8:45 p.m. equivalents on travel days). 911 with the highway, direction and milepost; the drivers know the next exit and plaza at all times.	- Any breathing difficulty, allergic reaction, head injury, fainting or severe pain: call 911 first, then Rachel. - The bus stops at the next safe place or where the dispatcher directs; Rachel treats; the student's chaperone stays with the student and the health record. - A chaperone rides in the ambulance or follows with the health record; Emily keeps the group and continues when responders release the bus. - Emily calls Jordan; the school calls the family.

Charter Bus Travel

Washington, DC
April 14 to 18, 2027

Severe or winter weather on the Allegheny sections

RISK G01-R05 · ENVIRONMENT

Overview	The Pennsylvania Turnpike crosses the Alleghenies between Somerset and Breezewood at elevation. Mid-April brings heavy rain and fog, and late snow is possible; the outbound leg runs through it in the morning and the return in the small hours.
Consequence	Reduced traction and visibility; a collision, or the group held on the road for hours.
Rating	Inherent High · 12 (likelihood 3, possible; severity 4, major) · Residual with the controls in place Moderate · 6 (likelihood 2, unlikely; severity 3, moderate)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
- Weather and road check with Jordan Patel on Tuesday, April 13; departure review the same day; decision rules agreed for delay or an extra hotel night. - The drivers set the speed and the stops; the bus is the shelter in severe weather. - Turnpike alerts followed by the drivers and Daniel Kim; a 25-minute margin is built into the outbound schedule. - Layers, water and the snack pack aboard for a long hold; medication case with the nurse.	- The drivers stop at the next plaza or safe place and hold; students stay on the bus with belts fastened. - Emily calls Jordan with the situation and the new estimate; Jordan messages families. - If the road closes, Emily and Jordan decide with Lakefront dispatch between waiting, a detour or a hotel; the school pays first and settles later.

Emergency care for this group. On the highway: call 911 and give the highway, direction and the nearest milepost or service plaza; emergency responders choose the hospital. Near the hotel: Adventist HealthCare White Oak Medical Center, 11890 Healing Way, Silver Spring, MD, 240-637-4000. In Washington: George Washington University Hospital, 900 23rd Street NW, 202-715-4000.

Live assessment on the day

The trip leader makes the live assessment; this is what to check and where to record it

CONDITIONS	GROUP READINESS	EQUIPMENT	SUPERVISION
Weather and road alerts on the turnpikes before each departure (Tuesday, April 13 check; again at 4:30 a.m. Wednesday and 8:00 p.m. Saturday); fog, ice or snow on the Allegheny sections; construction or closures on I-70 and the Beltway.	Every student present and belted; anyone unwell before boarding seen by Rachel Morgan, RN; dietary snacks and water aboard; students who get motion sick seated forward.	Seat belts working in every seat; restroom serviceable; first-aid kit and medication case with the nurse; phone chargers; drivers' schedule and Lakefront dispatch number with Daniel Kim.	Chaperones front, middle and rear; two awake on the overnight watch; head count closed by Emily Carter before every departure; driver handover names checked at 8:15 p.m. Saturday.

Hotel Overnight Stays

4 risks set out · Wednesday, April 14 to Saturday, April 17: three nights, with rooms from 3:00 p.m. Wednesday and checkout by 7:30 a.m. Saturday

Washington, DC
April 14 to 18, 2027

Where. Holiday Inn Washington—College Park (I-95), 10000 Baltimore Avenue, College Park, MD 20740 · 301-345-6700. Two student corridors with a chaperone room on each; the meeting room for dinners and seminars **Supervision.** Room check and medication round at 8:45 p.m.; lights-out 9:30 p.m. (Friday 10:00 p.m.); Marcus Lee and Daniel Kim on corridor watch until 11:00 p.m.; Emily Carter's phone on all night; Rachel Morgan's room is the medication station.

Students sleep in assigned triple rooms on two corridors. Chaperones check every room before students enter, run the evening room check and the morning and evening medication rounds, and walk the corridors until 11:00 p.m. One accessible room is held for health or contingency use.

Student leaves the room or the building at night

RISK G02-R01 · SUPERVISION

Overview	Three nights in a roadside hotel with exterior doors, a pool and public corridors. The risk is a student out of the room after lights-out, alone in the building or outside it.
Consequence	A student unsupervised at night; injury, contact with strangers, or a missing-student search.
Rating	Inherent High · 12 (likelihood 3, possible; severity 4, major) · Residual with the controls in place Moderate · 8 (likelihood 2, unlikely; severity 4, major)

CONTROLS AND MITIGATIONS

- Assigned rooms on two corridors, no room changes; a chaperone room on each corridor; doors closed after room check.
- Students stay on their floor after room check and do not use the pool, the fitness room or any exterior door; the rule is read aloud on arrival and is in the student agreement.
- Marcus Lee and Daniel Kim walk the corridors until 11:00 p.m.; Emily's phone stays on all night.
- The front desk has Emily's number and is asked to call if a student appears in the lobby after 9:30 p.m.
- The school confirms the hotel's night staffing and door-alarm arrangements before the trip and records them here.

EMERGENCY ACTIONS

- The chaperone who finds a room short confirms with the roommates where and when the student was last seen and calls Emily.
- Emily and Marcus check the corridors, stairwells, lobby and meeting room with hotel security; the other chaperones hold their corridors.
- If the student is not found within ten minutes, Emily calls 911 and Jordan Patel; Jordan handles the family.
- The student's return, the time and the circumstances are recorded, and the family is told the same night.

Fire alarm or building evacuation at night

RISK G02-R02 · EMERGENCY RESPONSE

Overview	An alarm at night with 30 students asleep on two corridors. The controls are knowing the route and the assembly point before the first night and counting at the assembly point.
Consequence	Injury in a real fire; students separated or unaccounted for during an evacuation.
Rating	Inherent High · 10 (likelihood 2, unlikely; severity 5, catastrophic) · Residual with the controls in place Moderate · 5 (likelihood 1, rare; severity 5, catastrophic)

CONTROLS AND MITIGATIONS

- On arrival, chaperones walk the stair route from both corridors to the hotel's assembly point and show it to every student before rooms open.
- The school confirms the assembly point and the hotel's evacuation procedure with the front desk and records them here.
- Every chaperone carries the rooming list; students are told to leave belongings and go straight to the assembly point with their roommates.
- Elevators are not used in an alarm; chaperones sweep their own corridor last.

EMERGENCY ACTIONS

- At the alarm, chaperones open their doors, direct students to the stairs and sweep every room on their corridor.
- Groups assemble at the assembly point; each chaperone counts their five and reports to Emily; Marcus confirms 30.
- Nobody re-enters until hotel staff or the fire department says so. Emily reports any missing student to the fire officer immediately.
- Emily calls Jordan once everyone is counted; Rachel checks anyone affected by smoke or cold.

Hotel Overnight Stays

Washington, DC
April 14 to 18, 2027

Illness at night and medication errors

RISK G02-R03 · HEALTH

Overview	Illness after lights-out, a missed or wrong dose, or a student with a chronic condition needing care in the night, with the designated emergency department 12 minutes away.
Consequence	A student untreated overnight, or a medication given wrongly.
Rating	Inherent Moderate · 9 (likelihood 3, possible; severity 3, moderate) · Residual with the controls in place Moderate · 6 (likelihood 2, unlikely; severity 3, moderate)
CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
• Rachel Morgan, RN, runs the medication station from her room with rounds at 7:00 a.m. and 8:45 p.m.; she holds the medication records and the family authorizations. • Medication arrives in its original container with the school's medication form by 3:30 p.m. on Tuesday, April 13; the nurse checks every dose against the form. • The accessible contingency room is held for a student who becomes unwell; Rachel assesses; Emily decides on a walk-in clinic with Jordan. • Emergency care: White Oak Medical Center, route on this page; 911 for breathing difficulty, head injury, allergic reaction, fainting or severe pain.	1. The chaperone on the corridor calls Rachel, who assesses and treats within her training; Emily is told. 2. For any of the 911 conditions, call 911 first, then Rachel; the hotel front desk is told an ambulance is coming. 3. Rachel or the chaperone rides with the student with the health record; Emily keeps the group and the corridors covered. 4. Emily calls Jordan; the school calls the family, and again with the outcome.

Food allergy or dietary error at hotel meals

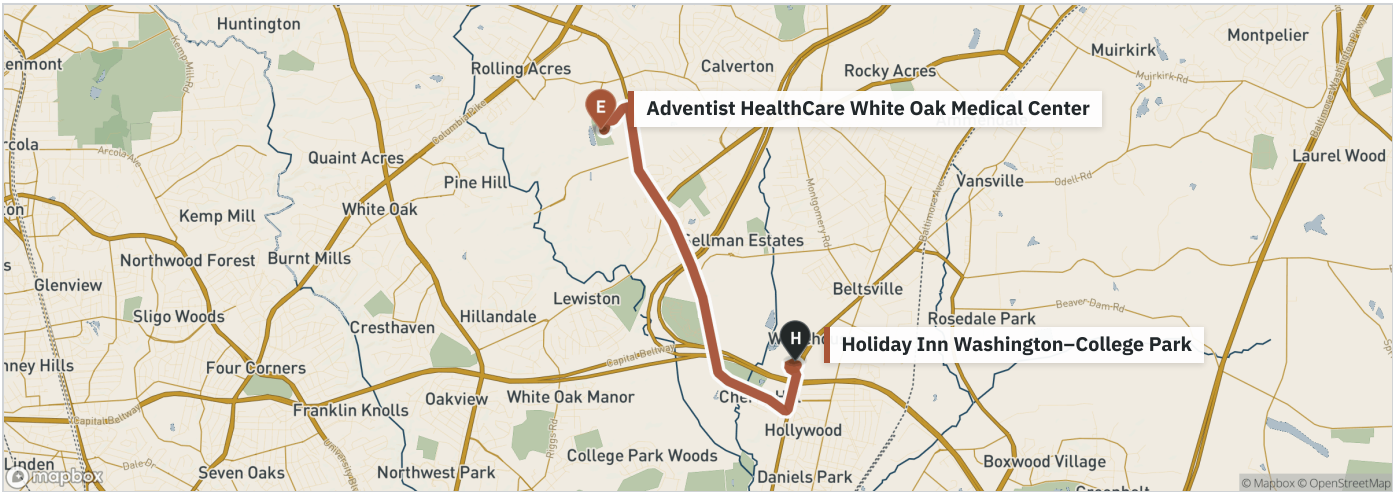

RISK G02-R04 · HEALTH

Overview	Hotel breakfasts and dinners delivered to the meeting room for 30 students, some with allergies or dietary needs. A serving error is most likely at a buffet.
Consequence	An allergic reaction, up to anaphylaxis; a student unable to eat for religious or medical reasons.
Rating	Inherent High · 12 (likelihood 3, possible; severity 4, major) · Residual with the controls in place Moderate · 8 (likelihood 2, unlikely; severity 4, major)
CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
• The dietary list from the roster goes to the hotel and every meal vendor on April 2; Daniel Kim confirms it with the front desk on arrival. • Rachel checks delivered meals against the list before service; students with allergies are served first from checked plates. • Students with prescribed auto-injectors carry them; Rachel carries the spare and the family's action plan. • Snack packs for the bus are checked against the list before they are packed.	1. At the first sign of a reaction, the nearest adult calls Rachel and, for any breathing difficulty or swelling, 911 first. 2. Epinephrine is given according to the student's action plan; the student is not left alone. 3. Rachel or the chaperone rides with the student with the health record; Emily calls Jordan; the school calls the family.

Hotel Overnight Stays

Museums and Public Buildings

4 risks set out · Thursday: National Archives 8:45 a.m., U.S. Capitol 12:30 p.m., Library of Congress 2:30 p.m. · Friday: African American History and Culture 10:00 a.m., American History 2:00 p.m. · Saturday: National Portrait Gallery 1:00 p.m.

Washington, DC
April 14 to 18, 2027

Where. Federal buildings and Smithsonian museums on and around the National Mall, each with security screening at the door
Supervision. One chaperone for every five students; the African American History and Culture galleries in three groups of ten with two chaperones each; a regroup point named each morning.

Timed programs, tours and self-guided visits inside six buildings: an educator-led program at the Archives, a Capitol tour and Exhibition Hall, the Library of Congress Great Hall, two Smithsonian museums on Friday and the Portrait Gallery on Saturday. Lunches are eaten outside; prohibited items stay on the bus.

Student separated in crowded galleries or at screening

RISK G03-R01 · SUPERVISION

Overview	Six buildings, each with screening lines, multiple floors and public crowds. Separation is most likely at the doors and in the largest galleries.
Consequence	A student alone in a large public building; distress; the group's schedule lost while searching.
Rating	Inherent High · 12 (likelihood 3, possible; severity 4, major) · Residual with the controls in place Low · 4 (likelihood 1, rare; severity 4, major)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
- Buddy pairs inside each group; students tell their chaperone before using a restroom and go with their buddy. - Head count inside every entrance, before every move between rooms or floors, and at every exit; Marcus Lee confirms 30. - Each morning Emily names the regroup point for every site; if the schedule is interrupted, groups go there and wait. - Chaperones at the front and rear of every screening line; groups of ten with two chaperones in the African American History and Culture galleries. - Every student carries the trip card and is told to stay put and ask a uniformed staff member for help if separated.	- Stop the group. The chaperone confirms where and when the student was last seen and calls Emily. - Emily alerts venue security at the nearest staffed point; Marcus holds the other groups at the regroup point. Students do not search. - If the student is not found within ten minutes, Emily calls Jordan Patel, who handles the family; venue security decides on a building search.

Security instruction, lockdown or evacuation

RISK G03-R02 · EMERGENCY RESPONSE

Overview	Federal buildings and museums close or evacuate at short notice for security reasons. The group must move as one and be counted quickly, sometimes without its bags or its bus.
Consequence	Students separated during a fast evacuation; the group held outside in weather; the day's plan lost.
Rating	Inherent Moderate · 8 (likelihood 2, unlikely; severity 4, major) · Residual with the controls in place Moderate · 6 (likelihood 2, unlikely; severity 3, moderate)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
- Follow venue staff immediately; groups move together; chaperones count as soon as the group is stationary. - Regroup at the day's regroup point, or at the bus if the site is closed; Daniel Kim confirms the pickup point with Thomas Reed by phone. - Lunches and prohibited items stay on the bus so screening is short and nothing has to be recovered in an evacuation. - Timed entries are protected in the order the leader card gives; the Supreme Court stop is dropped first on Thursday if the day runs late.	- Chaperones lead their groups out by the route staff give; nobody goes back for belongings. - Each chaperone counts their five and reports to Emily at the regroup point; Marcus confirms 30. - Emily reports to Jordan once everyone is counted and decides the rest of the day with the co-leader.

Museums and Public Buildings

Washington, DC
April 14 to 18, 2027

Heat, dehydration and fatigue on long days

RISK G03-R03 · HEALTH

Overview	Four to six miles of walking a day, long waits outside at screening and lunches eaten outdoors. April is usually mild, but a warm day or a cold wet one tests 13-year-olds by mid-afternoon.
Consequence	Faintness, dehydration or exhaustion; a student unable to continue.
Rating	Inherent Moderate · 6 (likelihood 3, possible; severity 2, minor) · Residual with the controls in place Low · 4 (likelihood 2, unlikely; severity 2, minor)

CONTROLS AND MITIGATIONS

- Refillable water bottles on the packing list; chaperones check them at breakfast and refill inside the museums.
- Lunch in the shade with a sit-down break; quiet time after the African American History and Culture galleries.
- Weather layers and a rain jacket checked at the backpack check each morning.
- Rachel Morgan, RN, moves with the group; a student who feels unwell sits with a chaperone and is not pushed on.

EMERGENCY ACTIONS

1. The chaperone sits the student down in the shade with water and calls Rachel; for fainting, call 911 first.
2. The student rests with Rachel or a chaperone and rejoins when well; if not, Emily decides on the bus or the hotel with Jordan.

Distress at difficult exhibition content

RISK G03-R04 · HEALTH

Overview	The History Galleries at the National Museum of African American History and Culture, the memorials and Arlington present slavery, war and loss directly. Some students will be affected, and a few strongly.
Consequence	A student distressed, withdrawn or unable to continue; a disclosure that needs school follow-up.
Rating	Inherent Moderate · 6 (likelihood 3, possible; severity 2, minor) · Residual with the controls in place Low · 4 (likelihood 2, unlikely; severity 2, minor)

CONTROLS AND MITIGATIONS

- Conduct and content rehearsed in class between March 22 and April 9; families told in the letter what students will see and study.
- Chaperones stay with their group through the galleries; a student may step out to a quiet space with a chaperone at any time.
- Aisha Thompson leads student support; quiet time is built in after the galleries, the memorials and Arlington; the evening journal debrief closes the day.
- The Arlington reflection stays private; no student is asked to share it.

EMERGENCY ACTIONS

1. The chaperone takes the student to a quiet space and stays with them; Aisha joins if needed.
2. Rachel is called if there is any physical symptom; Emily is told before the group moves on.
3. Anything a student discloses is passed to Jordan Patel the same day under school policy; the family is called by the school when that is right.

5 risks set out · Thursday lunch on the Capitol grounds and the walk to the Library of Congress and Supreme Court · Friday lunch at the Washington Monument grounds and the walk to the American History Museum · Friday 6:30 to 8:45 p.m., the memorial walk · Saturday 2:45 to 3:15 p.m., the Portrait Gallery to Lafayette Square

Washington, DC
April 14 to 18, 2027

Where. The National Mall, Constitution and Independence Avenues, 17th and 23rd Streets, the memorials from the World War II Memorial to the Korean War Veterans Memorial, and downtown streets between G Street and Pennsylvania Avenue **Supervision.** One chaperone for every five students; chaperones at the front and rear of the whole group on every walk; head count at every memorial; the 8:45 p.m. bus at Lincoln Memorial Circle does not slip.

Walking between sites and, on Friday evening, a 1.5-mile walk at dusk from the World War II Memorial through the Vietnam Veterans, Lincoln and Korean War Veterans memorials, with sunset about 7:45 p.m. and the memorials lit. On Saturday the group walks about 15 minutes from the Portrait Gallery to Lafayette Square and views the White House from Pennsylvania Avenue, subject to closures.

Traffic when crossing avenues and downtown streets

RISK G04-R01 · TRANSPORTATION

Overview	Constitution and Independence Avenues, 17th and 23rd Streets and the downtown blocks near the White House carry fast multi-lane traffic. A group of 36 takes two signal cycles to cross.
Consequence	A student struck by a vehicle; serious injury or death.
Rating	Inherent High · 15 (likelihood 3, possible; severity 5, catastrophic) · Residual with the controls in place Moderate · 5 (likelihood 1, rare; severity 5, catastrophic)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
• Cross only at signals and marked crosswalks, as one group; nobody starts on a flashing signal; the group waits for everyone before moving on. • Chaperones at the front and rear of the whole group; the front chaperone holds the group at the curb until the signal changes. • Emily chooses the crossing points each day and walks them in her head with the co-leader; the memorial walk uses the paths inside the Mall and crosses 23rd Street only at the signal. • Bus drop-off and pickup points confirmed by Daniel Kim with Thomas Reed so the group never waits at a curb.	1. Call 911; give the intersection. Rachel treats; a chaperone stops the group on the sidewalk and counts. 2. A chaperone rides with the student with the health record; Emily calls Jordan; the school calls the family.

Separation in darkness and crowds on the memorial walk

RISK G04-R02 · SUPERVISION

Overview	A 1.5-mile walk through four memorials after sunset, among evening crowds, with the bus waiting at a fixed time. The memorials are lit, but the paths between them are not all lit.
Consequence	A student alone at night on the Mall; distress; the 8:45 p.m. departure missed.
Rating	Inherent High · 12 (likelihood 3, possible; severity 4, major) · Residual with the controls in place Low · 4 (likelihood 1, rare; severity 4, major)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
• Groups stay within sight of their chaperone; buddy pairs; head count at each memorial and before each move. • Regroup point at each memorial's entrance and finally at Lincoln Memorial Circle; the bus is there from 8:00 p.m. • Restrooms at the Lincoln Memorial with a buddy and a chaperone; no student leaves a memorial alone. • Every student carries the trip card; chaperones carry phones with the flashlight on for the unlit paths. • The 8:45 p.m. departure is fixed; Emily shortens the walk rather than the margin.	1. Stop the group. The chaperone confirms where and when the student was last seen and calls Emily. 2. Emily calls U.S. Park Police through 911 and alerts the nearest ranger or staffed kiosk; Marcus holds the other groups at the next regroup point. 3. If the student is not found within ten minutes, Emily calls Jordan; the bus and one chaperone stay at Lincoln Memorial Circle until the student is found.

On Foot in Washington

Falls on steps, uneven paths and pool edges

RISK G04-R03 · ENVIRONMENT

Overview	The Lincoln Memorial steps, granite and gravel paths, the Reflecting Pool edge and the Korean War Veterans Memorial's low walls, walked at dusk and after rain.
Consequence	Sprains, cuts or a head injury from a fall; a student in the water.
Rating	Inherent Moderate · 9 (likelihood 3, possible; severity 3, moderate) · Residual with the controls in place Moderate · 6 (likelihood 2, unlikely; severity 3, moderate)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
- Closed-toe walking shoes are on the packing list and checked at the morning backpack check. - No running; students stay on the paths and away from the pool edge; the rear chaperone keeps the pace. - The Lincoln Memorial steps are taken with the group together, with a chaperone at the top and bottom.	- First aid within training; Rachel assesses; for a head injury or a fall into water, call 911 first. - A student who cannot continue waits with a chaperone at the nearest memorial while the bus is called to Lincoln Memorial Circle.

Rain, cold or a thunderstorm during the evening walk

RISK G04-R04 · ENVIRONMENT

Overview	Mid-April evenings in Washington are usually in the 50s, but rain is common and a thunderstorm brings lightning to an open Mall.
Consequence	Cold, wet students; lightning exposure; a walk cut short.
Rating	Inherent Moderate · 9 (likelihood 3, possible; severity 3, moderate) · Residual with the controls in place Low · 4 (likelihood 2, unlikely; severity 2, minor)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
- Rain jacket or poncho and a sweatshirt or fleece on the packing list; a bag check before the walk. - Emily makes the weather call by 5:00 p.m. Friday; the alternative is a bus loop of the memorials with one stop at the Lincoln Memorial. - In lightning, the group shelters in the Lincoln Memorial chamber or on the bus; nobody stays on the open Mall. - The bus is reachable at Lincoln Memorial Circle from 8:00 p.m. and can be called to the World War II Memorial stop earlier.	- Emily calls the walk off; chaperones move their groups to the bus or the nearest shelter and count. - Rachel checks anyone cold or wet; the hotel room check and lights-out move earlier if needed.

Demonstrations, security perimeters and closures near the White House

RISK G04-R05 · ENVIRONMENT

Overview	Lafayette Square and Pennsylvania Avenue are the city's main protest site and close without notice for security. A demonstration can form within minutes.
Consequence	The group caught in a crowd or a police operation; a student separated; the stop lost.
Rating	Inherent Moderate · 9 (likelihood 3, possible; severity 3, moderate) · Residual with the controls in place Low · 4 (likelihood 2, unlikely; severity 2, minor)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
- The stop is planned as subject to closures; Emily checks closures Saturday morning and again at 2:30 p.m. before leaving the gallery. - Groups do not enter a crowd; if a demonstration is under way, the group views the White House from the Ellipse side or skips the stop. - Immediate compliance with U.S. Secret Service, Park Police and Metropolitan Police instructions; the group leaves as one if asked to move. - Daniel Kim confirms the bus pickup point with Thomas Reed by 3:00 p.m. and again if the plan changes.	- Emily withdraws the group to the bus as one; chaperones count at the bus. - If a student is separated in a crowd, the separated-student procedure applies and police at the perimeter are told at once. - Emily calls Jordan with the change of plan.

Emergency care for this group. George Washington University Hospital Emergency Department, 900 23rd Street NW · 202-715-4000 · the closest emergency department to the memorials, the Mall and Lafayette Square (route on the previous page). For the Capitol grounds, responders choose the hospital; the Capitol Visitor Center has first-aid staff.

Live assessment on the day

The trip leader makes the live assessment; this is what to check and where to record it

CONDITIONS	GROUP READINESS	EQUIPMENT	SUPERVISION
Emily makes the weather call for the memorial walk by 5:00 p.m. Friday: heavy rain, lightning or wind chill below 40 °F replaces the walk with a bus loop and a single stop at the Lincoln Memorial. Closures, demonstrations or security perimeters at Lafayette Square and the White House checked Saturday morning and again at 2:30 p.m.	Walking shoes and a warm layer checked before the walk; anyone tired or unwell rides with Rachel on the bus; buddy pairs confirmed; restroom stop at the museum before leaving.	Chaperone phones charged with the flashlight tested; the trip card with every student; water; first-aid kit with Rachel; the bus reachable at Lincoln Memorial Circle from 8:00 p.m.	Front and rear chaperones named for each walk; count at every memorial and before every street crossing; regroup point at each memorial's entrance and finally at Lincoln Memorial Circle.

Arlington National Cemetery

3 risks set out · Saturday, April 17, 8:30 to 11:15 a.m.

Washington, DC
April 14 to 18, 2027

Where. Arlington National Cemetery, Virginia: the Welcome Center, the Kennedy gravesite, the Memorial Amphitheater and the Tomb of the Unknown Soldier, about two miles of walking on hills **Supervision.** One chaperone for every five students; the bus drops the group on the top deck of the parking garage within the 20-minute window, then parks; security screening at the Welcome Center; a conduct reminder before entering.

A self-guided walking visit to the Kennedy gravesite, the Memorial Amphitheater and the Tomb of the Unknown Soldier for the changing of the guard, which happens every half hour in spring. Funerals take place throughout the day; the group pauses for every procession.

Screening, the drop-off window and the group split between bus and Welcome Center

RISK G05-R01 · SUPERVISION

Overview	Every visitor is screened at the Welcome Center; the bus has a 20-minute drop-off window before it must move to park. The risk is a group half through screening while the bus, with a chaperone and stragglers, has to leave.
Consequence	Students separated between the garage, the screening line and the grounds; delay that loses the Tomb ceremony.
Rating	Inherent Moderate · 9 (likelihood 3, possible; severity 3, moderate) · Residual with the controls in place Low · 4 (likelihood 2, unlikely; severity 2, minor)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
• Arrive for opening at 8:30 a.m.; all 36 leave the bus together on the garage top deck with bags already checked; Thomas Reed parks after the drop. • Chaperones carry a government-issued photo ID; students under 16 need none; small backpacks only. • Groups pass through screening together and regroup inside the Welcome Center before anyone walks on; Marcus confirms 30. • Daniel Kim stays in phone contact with Thomas for the pickup on the top deck at 11:15 a.m.	1. If the line splits the group, the chaperones already through hold their groups inside the Welcome Center until everyone is counted. 2. A student held at screening stays with a chaperone; Emily deals with the screening staff. 3. If the bus must leave before everyone is off, the remaining chaperone stays on it with the students and rejoins at the garage.

Hills, distance and standing during the ceremony

RISK G05-R02 · HEALTH

Overview	About two miles on paved hills, then 30 minutes standing quietly at the Tomb plaza. Faintness during the changing of the guard is the common medical event here.
Consequence	Faintness, a fall or exhaustion; a student who cannot walk back.
Rating	Inherent Moderate · 9 (likelihood 3, possible; severity 3, moderate) · Residual with the controls in place Moderate · 6 (likelihood 2, unlikely; severity 3, moderate)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
• Water bottles filled at the Welcome Center; a rest at the amphitheater before the Tomb; benches used on the route. • A student who feels unwell sits with a chaperone; Rachel moves with the group and is called by phone. • Layers for a cool morning; the pace set by the rear chaperone, not the front. • Restrooms at the Welcome Center before and after the walk.	1. The chaperone sits or lays the student down away from the plaza and calls Rachel; for fainting or a head injury, call 911 first. 2. Cemetery staff are asked for help; responders drive inside the grounds. A chaperone rides with the student with the health record. 3. Emily calls Jordan; the school calls the family.

Conduct at a place of active mourning

RISK G05-R03 · SUPERVISION

Overview	Funerals proceed throughout the visit and the cemetery enforces its rules of conduct. A 13-year-old's lapse here offends families and can end the visit.
Consequence	Offense to mourners; removal of the group by cemetery staff; a distressed student.
Rating	Inherent Moderate · 6 (likelihood 3, possible; severity 2, minor) · Residual with the controls in place Low · 4 (likelihood 2, unlikely; severity 2, minor)

CONTROLS AND MITIGATIONS	EMERGENCY ACTIONS
- Conduct rehearsed in class: quiet voices, no food, no running, phones away, hats off at the Tomb, immediate compliance with staff. - A reminder before entering, given by Emily; chaperones stop and hold their group for every procession. - The reflection prompt is private and quiet time follows the Tomb; Aisha Thompson supports any student affected.	- A chaperone corrects quietly and moves the student to the back of the group; a repeated lapse means the student walks beside a chaperone for the rest of the visit. - Any instruction from cemetery staff is followed at once; Emily speaks for the group. - Serious or repeated conduct concerns are reported to Jordan and the family under school policy, as the student agreement says.

Emergency care for this group. Call 911; cemetery staff direct emergency responders inside the grounds, and responders choose the hospital. The school's designated emergency department in Washington is George Washington University Hospital, 900 23rd Street NW · 202-715-4000, across the Potomac from the cemetery.

Live assessment on the day

The trip leader makes the live assessment; this is what to check and where to record it

CONDITIONS	GROUP READINESS	EQUIPMENT	SUPERVISION
The screening line at the Welcome Center; ceremonies and funerals under way on the route; rain or a warm morning on the hills; any closure of the Tomb plaza.	Chaperones' photo ID in hand; bags checked before leaving the bus; walking shoes and water; the conduct reminder given before entering; anyone unwell stays with Rachel at the Welcome Center.	The trip card with every student; water; first-aid kit with Rachel; Daniel Kim's phone contact with Thomas Reed for the garage and pickup.	Groups through screening together; regroup inside the Welcome Center; count at the Welcome Center, the gravesite, the amphitheater and the Tomb; the group returns together to the Welcome Center.
