DOCUMENT	Annual Elementary Field Trip Risk Assessment Pack, Elementary School, school year 2026–27
SCOPE	30 one-day field trips, Grades 1 to 5, one per unit of inquiry
STATUS	Prepared before the school year, 3 August 2026. Dates follow the school calendar; a trip that moves keeps its page and its documentation.
PREPARED BY	ETI360 PTE. LTD. for Harborview International School
VERSION	1.0, issued to the Head of Elementary and the trip coordinators

This register organizes the planning and documentation for each field trip: the schedule, the venues, the route from school, the emergency department the school named, and the documentation set prepared for the visit. ETI360 prepares and organizes these working documents; the school reviews, completes, amends as necessary, and approves each trip and its risk assessment. ETI360 does not advise, certify, or guarantee outcomes.

Harborview International School is ETI360's sample school and is not a real school. The venues, addresses, routes, and hospitals are real; the students, staff, and dates are illustrative.

Two venues per trip

, all within Singapore · standard departure 08:15, return 14:10 to 14:45

What every trip carries

Each field trip page records the same set, prepared in one pass before the year begins, so a trip coordinator, a parent, or the Head of Elementary reads every trip the same way.

- 1 Itinerary, minute by minute, with the two venues and the bus legs
 - 2 Parent information letter, in the school's own name
 - 3 Risk-assessment working documents, one per activity group, for the school to complete and approve
 - 4 Weather note from the 15-year record for the date
 - 5 Route from school and the emergency department the school named, both mapped
-

How the register is used

The register is the elementary school's single list of one-day trips for the year. A trip that moves keeps its page: the date changes, the documentation stays attached. A new trip is added to the month it falls in with the same page. The school completes and approves each trip's risk assessment; the register records that the working documents were prepared, not that the trip is approved.

Reading a trip page

Top: the grade, the unit of inquiry, and the learning purpose the teachers wrote. Left: the schedule and notes for families. Right: the facts a duty desk needs on the day — times, venues, the route from school with its measured drive, the emergency department the school named with its measured drive, and the trip coordinator.
